

Aging Parent Driving Conversation — Action Checklist

PRINT THIS PAGE AND KEEP IT SOMEWHERE VISIBLE

IDENTIFY DRIVING WARNING SIGNS

- ☐ **Identify vision-related warning signs like difficulty seeing at night, missing stop signs, misjudging distances, or driving too slowly for conditions.:** Identify vision-related warning signs like difficulty seeing at night, missing stop signs, misjudging distances, or driving too slowly for conditions.
- ☐ **Note cognitive and processing warning signs such as getting lost on familiar routes, confusing brake and gas pedals, or slow reactions to traffic changes.:** Note cognitive and processing warning signs such as getting lost on familiar routes, confusing brake and gas pedals, or slow reactions to traffic changes.
- ☐ **Track behavioral and incident-based warning signs including unexplained car damage, near-misses, fender-benders, or sudden refusal to drive at night.:** Track behavioral and incident-based warning signs including unexplained car damage, near-misses, fender-benders, or sudden refusal to drive at night.
- ☐ **Apply the near-miss criterion by recognizing that a single incident may not be conclusive but a pattern or serious near-miss requires immediate action.:** Apply the near-miss criterion by recognizing that a single incident may not be conclusive but a pattern or serious near-miss requires immediate action.

CONDUCT OBJECTIVE ASSESSMENT

- ☐ **Use the AAA Roadwise Rx self-assessment tool as a general wellness screening and share it with your parent as something you are both doing together.:** Use the AAA Roadwise Rx self-assessment tool as a general wellness screening and share it with your parent as something you are both doing together.
- ☐ **Conduct an observation drive by sitting in the back seat while your parent drives and take detailed notes on mirror checks, signaling, and reactions.:** Conduct an observation drive by sitting in the back seat while your parent drives and take detailed notes on mirror checks, signaling, and reactions.
- ☐ **Schedule a professional driving evaluation with a Certified Driver Rehabilitation Specialist to obtain objective evidence of driving ability through vision, cognitive, and on-road testing.:** Schedule a professional driving evaluation with a Certified Driver Rehabilitation Specialist to obtain objective evidence of driving ability through vision, cognitive, and on-road testing.

- ☐ **Frame the professional evaluation as a routine preventive check-up recommended for all drivers over 65, not as a test they might fail.:** Frame the professional evaluation as a routine preventive check-up recommended for all drivers over 65, not as a test they might fail.

KNOW LEGAL AND MEDICAL OPTIONS

- ☐ **Research your state's specific DMV licensing requirements for older drivers including renewal frequency, vision testing, and any age-based restrictions.:** Research your state's specific DMV licensing requirements for older drivers including renewal frequency, vision testing, and any age-based restrictions.
- ☐ **Understand your state's physician reporting provisions which allow or require doctors to report medical conditions that may impair driving ability.:** Understand your state's physician reporting provisions which allow or require doctors to report medical conditions that may impair driving ability.
- ☐ **Discuss concerns with your parent's primary care physician before pursuing medical reporting to understand the process and implications.:** Discuss concerns with your parent's primary care physician before pursuing medical reporting to understand the process and implications.
- ☐ **Recognize that physician reporting triggers a review process with the licensing authority rather than an automatic or immediate license revocation.:** Recognize that physician reporting triggers a review process with the licensing authority rather than an automatic or immediate license revocation.
