

Multi-entity tax deadline tracker template with automated reminders and calendar integration — Action Checklist

PRINT THIS PAGE AND KEEP IT SOMEWHERE VISIBLE

BUILD YOUR ENTITY FOUNDATION

- ☐ **Build Your Entity Foundation:** Open a new spreadsheet labeled "Entity Inventory Master" with columns for Entity Name, Entity Type, State of Formation, State(s) of Registration, Formation Date, EIN, Tax Classification, Registered Agent, Principal Address, and Notes.
- ☐ **Build Your Entity Foundation:** Fill in every entity you own as a separate row in your spreadsheet, including entities you have not officially dissolved yet, so nothing falls through the cracks.
- ☐ **Build Your Entity Foundation:** Export your entity inventory to cloud storage and set a recurring quarterly reminder to review and update it as your single source of truth going forward.
- ☐ **Build Your Entity Foundation:** Add notes to each entity row for special circumstances, pending filings, or anything else that requires ongoing attention so the document captures your complete situation at a glance.

CONFIGURE AUTOMATED REMINDERS

- ☐ **Configure Automated Reminders:** Map all tax obligations by jurisdiction, listing every filing type, due date, and payment requirement for federal, state, and county levels across all your entities.
- ☐ **Configure Automated Reminders:** Set automated reminders in your calendar system to send notifications 30 days before each tax deadline so you have adequate time to gather documents and prepare filings.
- ☐ **Configure Automated Reminders:** Schedule internal buffer zones by targeting all filings and payments at least 5 business days before the actual deadline to prevent last-minute scrambles and processing delays.
- ☐ **Configure Automated Reminders:** Create calendar blocks for year-end filing coordination that mark when each entity's return is due and when your accountant needs supporting documents from you.

ESTABLISH MAINTENANCE RHYTHMS

- ☐ **Establish Maintenance Rhythms:** Build audit-ready documentation by maintaining organized folders with copies of all filed returns, correspondence with tax authorities, and payment receipts organized by year and entity.
 - ☐ **Establish Maintenance Rhythms:** Create backup protocols by designating a second person in your organization or an external accountant who can access your tax calendar and deadlines if you are unavailable.
 - ☐ **Establish Maintenance Rhythms:** Schedule quarterly system reviews where you verify that all entities are properly registered, check for any law changes affecting your obligations, and update your reminder system accordingly.
 - ☐ **Establish Maintenance Rhythms:** Design your system to survive your busiest seasons and planned time off by ensuring all deadlines are visible, reminders are automated, and backup contacts know your filing schedule.
